

Jockey/Jacking Pumpsets

Aline manufactures and stocks a large range of capable jockey pump systems for use in conjunction with our range of diesel and electric Fire Pumps. Built with reliable and high quality components, the range spans from smaller low head systems right through to extremely high head units suitable for use in large buildings or high pressure applications. All units are built to relevant Australian standards and specifications in our Sydney manufacturing facility.

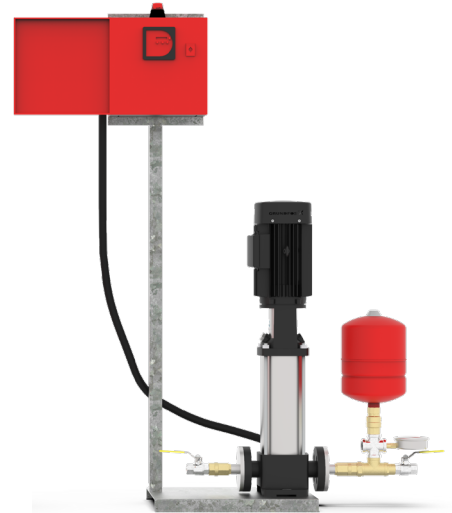

Typical Configurations

AVM3-27 High Head Pumpset

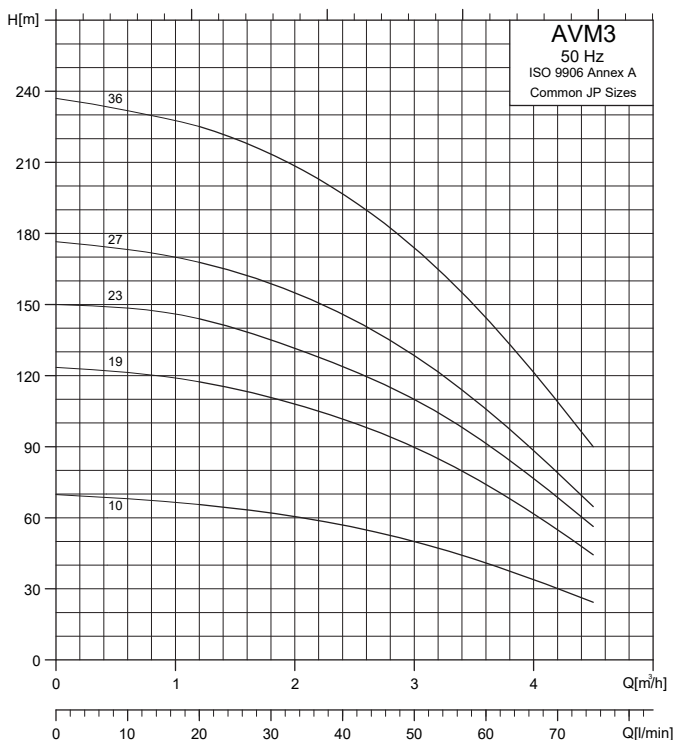

AVM3-19 Pumpset

AVM3-19 Pumpset with standalone Panel

Jockey Pump Curves

KF4 Jockey Pumpset

The KF4 jockey pumpset is a very capable pumpset for jockey applications, especially given it's small form factor. Able to achieve high head pressures at low flow, it is the ideal replacement for an existing system or for an install where space is tight.
